

MAC ANNUAL PLAN 2009

“Educating students for their future not our past”

At MAC we value individual difference, we enjoy success, we believe in self responsibility and the values needed to become well-rounded citizens. We will be innovative and embrace change.

- To implement, support, resource and evaluate the Science department action plan.
- To use assessment data more effectively (including the setting of specific targets) to better inform teaching and learning and the BOT as to student achievement.

- To support and extend the use of Technology in teaching and learning.
- To continue the implementation of the Revised Curriculum based on an agreed timeline. (This would include emphasis on KC's, Principles and Pedagogy as part of planning our own subject curriculums).
- To have all staff participate in PD related to our bicultural society.

- To investigate and implement a Mentoring programme which includes the Upper Clutha community.

“Mount Aspiring College is a learning community not a teaching organisation”.
